

TERCENTENARY COMMEMORATION

William Harvey

September 17, 1957

At the Clinical Center Auditorium
National Institutes of Health
Bethesda, Maryland
Sponsored by
National Heart Institute and
National Library of Medicine

*Inscription on Harvey's tombstone on the West wall of the
North transept of the church at Hempstead, Essex*
(Translation from the Latin ascribed to Sir George Ent).

William Harvey, at the mention of whose honourable name all academies rise up out of respect, who was the first after many thousand years to discover the daily movement of the blood, and so brought health to the world and immortality to himself, who was the only one to free from false philosophy the origin and generation of animals, to whom the human race owes its acquirements of knowledge, to whom medicine owes its very existence.
